Marshallese, etc. ↴ |

- Some other race – Print race or origin. ↴

2020 Census Race Question

Definition of “AI or AN” Used by U.S. Census Bureau (DOC)

According to the U.S. Office of Management and Budget (OMB), “American Indian or Alaska Native” refers to a person having origins in any of the original peoples of North and South America (including Central America), **and** who maintains tribal affiliation or community attachment.

OMB Definition of “American Indian or Alaska Native” for the 2020 Census

- Includes people who marked the “American Indian or Alaska Native” (AIAN) race category
- Respondents also asked to report tribal names such as:
 - North American Indian groups (e.g., Navajo, Blackfoot tribe)
 - Alaska Native groups (e.g., Native Village of Barrow Inupiat Traditional Gov't)
 - Central American Indian groups (e.g., Aztec)
 - South American Indian groups (e.g., Mayan)*

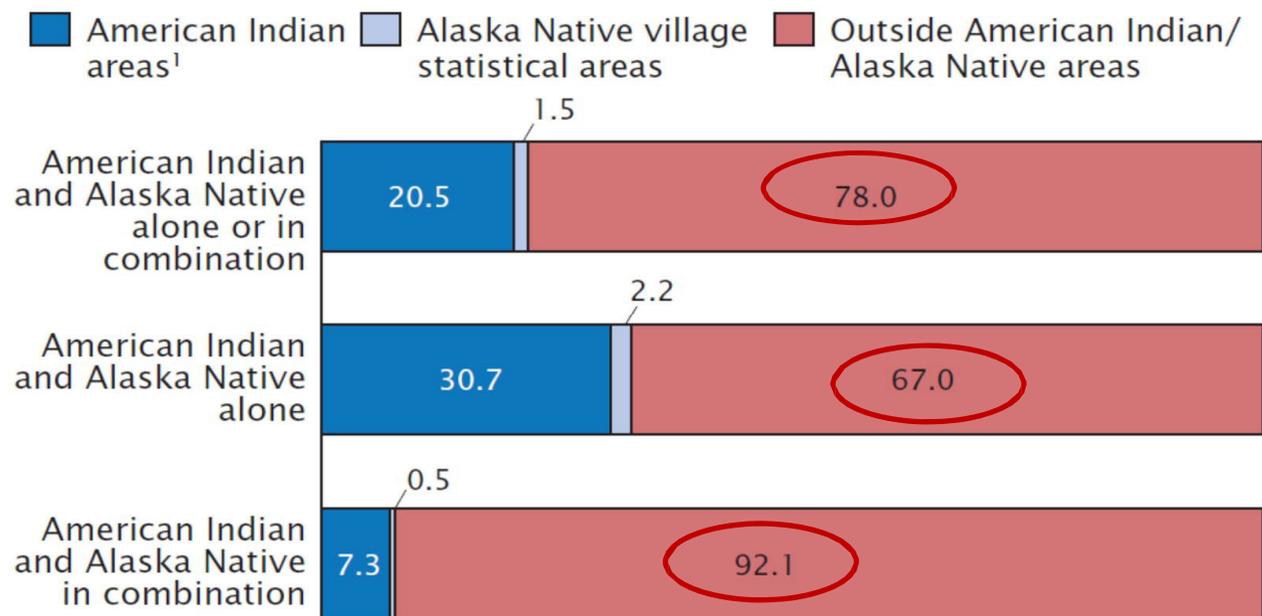

Race Concepts

- Race **alone** population –
people who reported a single race group
(e.g., American Indian and Alaska Native alone)
- Race **in combination** population –
people who reported more than one race group (e.g., American Indian
and Alaska Native **and** White; American Indian and Alaska Native **and**
Black)
- Race **alone or in combination** population –
all people who reported a particular race group, either alone, or in
combination with one or more other race groups

AIAN Population: 2000 and 2010

	<u>2000</u>	<u>2010</u>	<u>Increase</u>
AIAN alone or in any combination	4,119,301	5,220,579	1,101,278
AIAN alone	2,475,956	2,932,248	456,292
AIAN in combination	1,643,345	2,288,331	644,986

Percentage Distribution of the AIAN Population by Area of Residence: 2010

¹Includes federal American Indian reservations and/or off-reservation trust lands, Oklahoma tribal statistical areas, tribal designated statistical areas, state American Indian reservations, and state designated American Indian statistical areas.
 Note: Percentages may not add to 100.0 due to rounding. AIAN refers to American Indian and Alaska Native.

The American Indian and Alaska Native Population: 2010

2010 Census Briefs

Issued January 2012

C2010BR-10

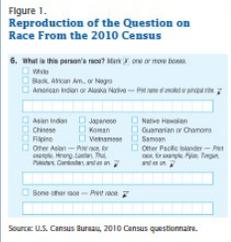

INTRODUCTION

According to the 2010 Census, 5.2 million people in the United States identified as American Indian and Alaska Native, either alone or in combination with one or more other races. Out of this total, 2.9 million people identified as American Indian and Alaska Native alone. Almost half of the American Indian and Alaska Native population, or 2.3 million people, reported being American Indian and Alaska Native in combination with one or more other races. The American Indian and Alaska Native in combination population experienced rapid growth, increasing by 39 percent since 2000.

This report provides a portrait of the American Indian and Alaska Native population in the United States and discusses that population's distribution at the national level and at lower levels of geography.¹ It is part of a series that analyzes population and housing data collected from the 2010 Census.

The data for this report are based on the 2010 Census Redistricting Data (Public Law 94-171) Summary File, which was the first 2010 Census data product released with data on race and Hispanic origin, including information on the American Indian and Alaska Native population, and was provided to each state for use in drawing boundaries for legislative

¹ This report discusses data for the 50 states and the District of Columbia, but not Puerto Rico.

districts.² Data for this report also come from the 2010 Census Summary File 1, which was the first 2010 Census data product to provide information on selected detailed American Indian and Alaska Native tribal groupings, such as Navajo, Cherokee, or Inupiat.^{3,4}

² Information on the 2010 Census Redistricting Data (Public Law 94-171) Summary File is available online at <http://2010.census.gov/2010census/data/redistricting-data.php>.

³ Information on the 2010 Census Summary File 1 is available online at <http://2010.census.gov/news/press-kits/summaryfile-1.html>.

⁴ American Indian tribal groupings refer to the combining of individual American Indian tribes, such as Fort Sill Apache, Mescalero Apache, and San Carlos Apache, into the general Apache tribal grouping. For Alaska Natives, tribal groupings refer to the combining of individual Alaska Native tribes, such as King Salmon Tribe, Native Village of Kenai, and Suvik Tribe of Kodiak, into the general Alutik tribal grouping.

American Indian or Alaska Native tribes, not specified ⁵	693,709	-	652,253	1	1,545,963

- Represents zero.

¹ The numbers by American Indian and Alaska Native tribal grouping do not add to the total American Indian and Alaska Native population. This is because the American Indian and Alaska Native tribal groupings are tallies of the number of American Indian and Alaska Native respondents rather than the number of American Indian or Alaska Native respondents. Respondents reporting several American Indian or Alaska Native groups are counted several times. For example, a respondent reporting Cherokee and Navajo would be included in the Cherokee as well as the Navajo numbers.

² Excludes respondents who wrote in an American Indian tribe not specified in the American Indian and Alaska Native Tribal Detailed Classification List for the 2010 Census or wrote in the generic term "American Indian."

³ Includes respondents who wrote in an Alaska Native tribe not specified in the American Indian and Alaska Native Tribal Detailed Classification List for the 2010 Census or wrote in the generic term "Alaska Native."

⁴ Includes respondents who checked the "American Indian or Alaska Native" response category on the census questionnaire.

Source: U.S. Census Bureau, 2010 Census special tabulation.

AI or AN Tribal Sub-Question: Two Types of Non-Response

	<u>2010</u>	
AIAN Response Rejected by Bureau	264,253	5.1%
AIAN No Response	1,545,963	29.6%
AIAN Response Rejected & No Response	1,810,216	35%

Post 2010 Census Review & Research

- In 2010-2014, the Census Bureau conducted the Alternative Questionnaire Experiment (AQE)
- Qualitative data captured and measured significant confusion and/or apprehension among mixed race AIAN and AIAN only research participants on “AIAN” race term
- Significant amount of confusion and apprehension with tribal sub-question under the AIAN checkbox and the instructions

National Advisory Committee: Recommended Further Testing on Race Question

- In 2014, the NAC recommended additional testing of the proposed combined race and Hispanic origin question.
- NAC also recommended further testing on Race question concerning the AIAN race name and tribal sub-question
- The Bureau designed and conducted a series of qualitative research activities carried out in the fall of 2014
- The research didn't include testing AIAN race name changes

AIAN Race Term & Tribal Sub-Question

- AIAN is a political and legal status for federally recognized tribes and their membership within in the United States
- OMB Definition has geographical components much larger in scope than “AI or AN” Race Title
- Large numbers of people originating from North, Central, and South America don’t identify nor are familiar with AIAN as a term for race
- OMB definition sets forth a tribal affiliation and community involvement standard and not a membership or enrollment standard
- Millions of Americans are racially AIAN and aren’t enrolled members

Reasons for Response Rejection

- Respondents check the AIAN box and:
 - Write a generic name like “Native American” or “Indian”
 - For the large tribal groupings, many respondents write in “Sioux” or “Apache”, for example, and do not specify the federally recognized name.
 - Write in the traditional name of their tribe or clan name
- U.S. Census Bureau maintains a Detailed Tribal Classification List
 - If tribal sub-question responses do not match with a tribal name on the list, the response is disqualified
 - Unlike non-response follow up by field operations, there is no follow-up with AIAN respondents whose response on tribal sub-question fails to match the classification list

Reasons for Non-Responses To Sub-Question

- Respondents are confused
 - What does Principal Tribe mean?
 - Must I be an enrolled member to write in a tribal name?
- The AIAN Checkbox and Tribal Sub-Question work together
 - “I know I’m part (INSERT TRIBE), but I’m not enrolled so I don’t check the box”
 - “I know I am part Indian but I don’t know which tribe so I don’t check the box”
 - “I know my tribe, I check the box, but don’t write in the name because ____.”
- Historical Racism?

Need For New Race Category Consistent with OMB Definition

- Geographical component of OMB Definition is correct
- Tribal Affiliation and Community Involvement Component does not reflect reality of race component
- Census Bureau lacks resources to validate tribal enrollment
- If tribal enrollment numbers are needed, the Tribes are proper organizations for that data

Example Changes for AIAN Race Term

- American Indian, Alaska Native, or Indigenous of the Americas
- Indigenous or Original Peoples of North, Central or South America
- Original Person of the Americas
- Native of North, Central or South America (NNCSA)

Why Is This Important?

- Representation (Congressional Districting)
- Funding
 - Healthcare
 - Education
 - Housing
 - Infrastructure
- Single biggest Civil Rights Issue for the “AIAN” community
- Tribal governments lose out on hundreds of millions of dollars each year.
